INDEX TO VOLUME 78

"Starred items are Shorter Notes"

Abatzoglou, Theagenis. *Finite-dimensional Banach spaces with a.e. differentiable metric projection,* 492.

Abramson, Fred G. *A simplicity theorem for amoebas over random reals,* 409.

Aguadé, J. *How to recognize a localized sphere,* 601.

Allenby, R. B. J. T. *Normal subgroups contained in Frattini subgroups are Frattini subgroups,* 315.

Allenby, R. B. J. T., Moser, L. E. and Tang, C. Y. *The residual finiteness of certain one-relator groups,* 5.

Amayo, Ralph K. *On a class of finite-dimensional Lie algebras,* 193.

Argyros, S. *On the dimension of injective Banach spaces,* 267.

Armendariz, Efraim P. *Modules with Artinian prime factors,* 311.

Aubin, Jean-Pierre and Siegel, Jerrold. *Fixed points and stationary points of dissipative multivalued maps,* 391.

Bahri, A. P. and Mahowald, M. E. *A direct summand in $H^*(MO\langle 8\rangle, Z_2)$,* 295.

Batty, C. J. K. *Perturbations of ground states of type I C^*-algebras,* 539.

Beauregard, Raymond A. *Left versus right LCM domains,* 464.

Beer, Gerald. *On closed starshaped sets and Baire category,* 555.

Blackadar, Bruce E. *A simple C^*-algebra with no nontrivial projections,* 504.

Blair, Robert L. *Proof of a theorem of Burke and Hodel on the cardinality of topological spaces,* 449.

Boda, Eduard and Vogel, Wolfgang. *On system of parameters, local intersection multiplicity and Bezout's Theorem,* 1.

Bourgain, J. *l^∞/c_0 has no equivalent strictly convex norm,* 225.

Burckel, R. B. *Averaging a representation over a subgroup,* 399.

Burry, David W. *The distribution of modular representations into blocks,* 14.

Calder, Allan and Siegel, Jerrold. *Homotopy and uniform homotopy. II,* 288.

Cambern, Michael. *On L^1 isomorphisms,* 227.

Campbell, Douglas, Cima, Joseph and Stephenson, Kenneth. *A Bloch function in all H^p classes, but not in* BMOA, 229.

Carlson, John W. *Developable spaces and nearness structures,* 573.

Charalambous, M. G. *Compactifications with countable remainder,* 127.

———. *An example concerning inverse limit sequences of normal spaces,* 605.

Chen, Su-shing. *On boundedness of integrable automorphic forms in $\mathbf{C}^n$,* 342.

Chung, Kai Lai and Lindvall, Torgny. *On recurrence of a random walk in the plane,* 285.

Cima, Joseph. See Campbell, Douglas.

Coram, D. S. and Duvall, P. F., Jr. *A Hurewicz-type theorem for approximate fibrations,* 443.

Coven, Ethan M. *Topological entropy of block maps,* 590.

Craggs, R. *On finite presentations for groups,* 170.

Crandall, Michael G. and Tartar, Luc. *Some relations between nonexpansive and order preserving mappings,* 385.

Daughtry, John. *The inaccessible invariant subspaces of certain C_0 operators,* 51.

Davis, S. W. *A nondevelopable Čech-complete space with a point-countable base,* 139.

DeMeyer, F. R. *The closed socle of an Azumaya algebra,* 299.

Donoghue, William F., Jr. *Monotone operator functions on arbitrary sets,* 93.

Dotzel, Ronald M. *A note on the Borel formula,* 585.

Dubins, Lester E. and Pitman, Jim. *A divergent, two-parameter, bounded martingale,* 414.

Duvall, P. F., Jr. See Coram, D. S.

Edgar, G. A. and Talagrand, Michel. *Liftings of functions with values in a completely regular space,* 345.

Eloe, P. W. and Grimm, L. J. *Monotone iteration and Green's functions for boundary value problems,* 533.

Fabes, Eugene B. and Neri, Umberto. *Dirichlet problem in Lipschitz domains with* BMO *data*, 33.
Fenton, P. C. *The infimum of small subharmonic functions*, 43.
Fillmore, Jay P. *A note on integral geometry in the inversive plane*, 551.
Fleissner, William G. and Miller, Arnold W. *On Q sets*, 280.
Fox, Thomas F. *Algebraic deformations and triple cohomology*, 467.
Garske, Gerhard. *An inequality concerning the smallest disc that contains the spectrum of an operator*, 529.
Gerth, Frank III. *The ideal class groups of two cyclotomic fields*, 321.
Glasner, S. *A note on weakly mixing functions*, 124.
Goel, R. M. and Sohi, N. S. *A new criterion for p-valent functions*, 353.
Goffman, Casper and Liu, Fon-che. *Derivative measures*, 218.
Govaerts, W. *Bornological spaces of non-Archimedean valued functions with the compact-open topology*, 132.
Grimm, L. J. See Eloe, P. W.
Haack, Joel K. *Incidence rings with self-duality*, 165.
Hag, Per. *Bounded extension property and p-sets*, 235.
Hagler, James and Sullivan, Francis. *Smoothness and weak* sequential compactness*, 497.
Hamilton, D. H. and Tuan, P. D. *Radius of starlikeness of convex combinations of univalent starlike functions*, 56.
Hartwig, Robert E. *An application of the Moore-Penrose inverse to antisymmetric relations*, 181.
Hausmann, Jean-Claude. *Finiteness of isotopy classes of certain knots*, 417.
Hennefeld, Julien. *A note on M-ideals in B(X)*, 89.
Hirano, Norimichi. *A proof of the mean ergodic theorem for nonexpansive mappings in Banach space*, 361.
Howland, James S. *A decomposition of a measure space with respect to a multiplication operator*, 231.
Hubbuck, J. R. *A conjecture on the p-regularity of an H-space*, 149.
Hwang, Chii-Ruey. *Gaussian measure of large balls in a Hilbert space*, 107.
Ishihara, Tôru. *Radii of immersed manifolds and nonexistence of immersions*, 276.
*Jacobowitz, H. *Reducing the codimension of Kähler immersions*, 453.
Jain, V. K. *Some transformations of basic hypergeometric series and their applications*, 375.
Johnson, Dennis. *Homomorphs of knot groups*, 135.
Jones, Gary D. *Oscillation properties of* $y^n + py = 0$, 239.
Jordan, G. S., Madych, W. R. and Wheeler, R. L. *Linear convolution integral equations with asymptotically almost periodic solutions*, 337.
Joshi, M. C. See Srikanth, P. N.
Kannan, V. and Raju, S. Radhakrishneswara. *The nonexistence of invariant universal measures on semigroups*, 482.
Kelman, Robert B. *Simple example of nonuniqueness for a dual trigonometric series*, 245.
Kenig, Carlos E. and Tomas, Peter A. *The weak behavior of spherical means*, 48.
Khurana, Surjit Singh. *Weak sequential convergence in* L_E^{∞} *and Dunford-Pettis property of* L_E^1, 85.
Kim, K. H. and Roush, F. W. *Reflexive lattices of subspaces*, 17.
Kitamura, Yuichi and Kusano, Takaŝi. *Oscillation of first-order nonlinear differential equations with deviating arguments*, 64.
Kucera, J. and McKennon, K. *Dieudonné-Schwartz theorem on bounded sets in inductive limits*, 366.
Kumagai, Donna. *Subharmonic functions and uniform algebras*, 23.
Kunen, Kenneth, van Mill, Jan and Mills, Charles F. *On nowhere dense closed P-sets*, 119.
Kusano, Takaŝi. See Kitamura, Yuichi.
Lancaster, Kirk E. and Petersen, Bent E. *Systems of partial differential operators with fundamental solutions supported by a cone*, 247.
*Lau, A. *Plane continua and transformation groups*, 608.
Lawson, Jimmie D. *Algebraic conditions leading to continuous lattices*, 477.
Lee, Dong Hoon. *Algebraic automorphism groups of pro-affine algebraic groups*, 175.
Lindvall, Torgny. See Chung, Kai Lai.
Liu, Fon-che. See Goffman, Casper.
Liu, Ming-Chit, Ng, Shu-Ming and Tsang, Kai-Man. *An improved estimate for certain diophantine inequalities*, 457.

Loveland, L. D. *Unions of cells with applications to visibility,* 580.
McCartney, Philip W. and O'Brien, Richard C. *A separable Banach space with the Radon-Nikodým property that is not isomorphic to a subspace of a separable dual,* 40.
McKennon, K. See Kucera, J.
Mader, Adolf. *A lemma on extensions of abelian groups,* 304.
Madych, W. R. See Jordan, G. S.
Mahowald, M. E. See Bahri, A. P.
Mauceri, Giancarlo and Picardello, Massimo A. *Noncompact unimodular groups with purely atomic Plancherel measures,* 77.
Mekler, Alan H. *On residual properties,* 187.
Mielke, M. V. *Differentiable decompositions of manifolds into totally C^{∞}-path disconnected subsets,* 439.
van Mill, Jan. See Kunen, Kenneth.
Miller, Arnold W. *There are no Q-points in Laver's model for the Borel conjecture,* 103.
———. See Fleissner, William G.
Mills, Charles F. See Kunen, Kenneth.
Milnor, Tilla Klotz. *Mapping surfaces harmonically into E^{n},* 269.
Mizokami, Takemi. *On submetrizability and G_{δ}-diagonals,* 111.
Moser, L. E. See Allenby, R. B. J. T.
Moskowitz, Martin. *An abstract Borel density theorem,* 19.
Nadler, Sam B., Jr. *Fixed points for confluent maps onto disks,* 116.
Nathanson, Melvyn B. *Sumsets of measurable sets,* 59.
Navarro Aznar, Vicente. *On the Chern classes and the Euler characteristic for nonsingular complete intersections,* 143.
Neri, Umberto. See Fabes, Eugene B.
Ng, Shu-Ming. See Liu, Ming-Chit.
Nyikos, Peter J. *A provisional solution to the normal Moore space problem,* 429.
O'Brien, Richard C. See McCartney, Philip W.
Ogiue, Koichi and Tachibana, Shun-ichi. *Kaehler manifolds of positive curvature operator,* 548.
Pasicki, Lech. *Retracts in metric spaces,* 595.
Passman, D. S. *The radical of the center of a group algebra,* 323.
Petersen, Bent E. See Lancaster, Kirk E.
Picardello, Massimo A. See Mauceri, Giancarlo.
Pillay, P. *On semihereditary noncommutative polynomial rings,* 473.
Pitman, Jim. See Dubins, Lester E.
Raju, S. Radhakrishneswara. See Kannan, V.
Ramsey, L. Thomas. *A theorem of C. Ryll-Nardzewski and metrizable l.c.a. groups,* 221.
*Randol, Burton. *The length spectrum of a Riemann surface is always of unbounded multiplicity,* 455.
Rhoades, B. E. *Hausdorff matrices as bounded operators over l,* 210.
Roberts, Paul. *Abelian extensions of regular local rings,* 307.
Rogers, James T., Jr. *Weakly confluent mappings and finitely-generated cohomology,* 436.
Roitman, J. *Easy S and L groups,* 424.
Ross, James. *A Morrey-Nikol'skii inequality,* 97.
Roush, F. W. See Kim, K. H.
Rubio de Francia, José L. *Vector valued inequalities for Fourier series,* 525.
Saab, Elias. *Universally Lusin-measurable and Baire-1 projections,* 514.
Saltman, David J. *On p-power central polynomials,* 11.
Saworotnow, Parfeny P. *Characterization of the trace-class,* 545.
Scott, S. D. *Finitely generated right ideals of transformation near-rings,* 475.
Sestier, Andrés. *Note on a theorem of Berlinskii,* 358.
Sgro, J. A. *Interpolation fails for the Souslin-Kleene closure of the open set quantifier logic,* 568.
Shaw, Sen-Yen. *Ergodic projections of continuous and discrete semigroups,* 69.
Siegel, Jerrold. See Aubin, Jean-Pierre.
———. See Calder, Allan.
Sohi, N. S. See Goel, R. M.
Srikanth, P. N. and Joshi, M. C. *Existence theorems for generalized Hammerstein equations,* 369.
Staffans, Olof J. *A Volterra equation with square integrable solution,* 213.

*Stegall, Charles. *A proof of the principle of local reflexivity*, 154.
Stephenson, Kenneth. See Campbell, Douglas.
Strelitz, Sh. *A remark on the growth of solutions of first order algebraic differential equations*, 509.
Sullivan, Francis. See Hagler, James.
Swarup, G. A. *Boundary preserving maps of 3-manifolds*, 291.
Tachibana, Shun-ichi. See Ogiue, Koichi.
Talagrand, Michel. See Edgar, G. A.
Tang, C. Y. See Allenby, R. B. J. T.
Tartar, Luc. See Crandall, Michael G.
Thompson, Robert C. *The Smith invariants of a matrix sum*, 162.
Tomas, Peter A. See Kenig, Carlos E.
Treger, Robert. *On p-torsion in etale cohomology and in the Brauer group*, 189.
Trench, William F. *Interpolating functions associated with second-order differential equations*, 253.
Tsang, Kai-Man. See Liu, Ming-Chit.
Tuan, P. D. See Hamilton, D. H.
Valentine, J. E. and Wayment, S. G. *The Ceva Property characterizes real, strictly convex, Banach spaces*, 559.
Vitulli, Marie A. *Complete intersections in C^n and R^{2n}*, 331.
Vogel, Wolfgang. See Boda, Eduard.
Walters, Terry. *A characterization of positive linear functionals and oscillation criteria for matrix differential equations*, 198.
Ward, James R., Jr. *Periodic solutions for a class of ordinary differential equations*, 350.
Warner, Seth. *Generalizations of a theorem of Mutylin*, 327.
Wayment, S. G. See Valentine, J. E.
Weiss, Richard. *Permutation groups with projective unitary subconstituents*, 157.
Weit, Yitzhak. *On Beurling's theorem for locally compact groups*, 259.
Wheeler, R. L. See Jordan, G. S.
Williams, J. P. *On a boundedness condition for operators with a singleton spectrum*, 30.
Williams, L. R. *Equality of essential spectra of certain quasisimilar seminormal operators*, 203.
Wolpert, Scott. *An asymptotic formula for the Taylor coefficients of automorphic forms*, 485.
Wright, C. R. B. *Frattini embeddings of normal subgroups*, 319.
Wu, H. *A remark on the Bochner technique in differential geometry*, 403.
*Younis, Rahman. *Interpolation by a finite Blaschke product*, 451.
Zalik, R. A. *Approximation by nonfundamental sequences of translates*, 261.
Zarantonello, Sergio E. *The extension of H^p-functions from certain hypersurfaces of a polydisc*, 519.
